

Herrmann Lack-Technik / L-Tec - Company portrait

# Optimum Know How

**Pösing – 11. September 2018 – Since 1970, automobile paint and equipment for workshops has been a forté of Johannes Herrmann. Hydraulic lifts is only one of the areas that Herrmann is well known for. In 1990 the activities in the areas of car body and paint shop equipment were focused into the companies L-Tec and Toplac. Toplac stands for everything concerning car body paint and L-Tec encompasses everything concerning the technique of car body paint.**

Being a man who always has the practical side life in the car body shop in mind, Johannes Herrmann holds about 50 patents. The newest invention of the 69-year-old tradesman being the IONSTAR, which is developed and sold by L-Tec.

From the middle of 1990 onwards, Johannes Herrmann concentrated mainly on the development of modern hydraulic lifts. The companies concerning paint were sold and weren't on the market anymore after 1995. Since the brand L-Tec still has to this day a splendid reputation it was reactivated with the introduction of the IONSTAR. Three employees are working at the moment on the European market. A big part of the administrative and organisational tasks is taken on by Herrmann Hebetchnik which in the meantime employs 40 staff members. This includes his son David who has joined the company 3 years ago and marks the 2nd Herrmann generation.
